Profile Summary

Certified Software Developer with 3+ years of hands-on experience in building scalable and high-performance web applications. Proficient in Core Java, spring, Spring Boot, Hibernate, and RESTful API development. Skilled in full-stack development using JSP/Servlets and Angular CLI for seamless frontend-backend integration. Experienced with relational databases like Oracle, including writing complex SQL queries and optimizing performance. Well-versed in SDLC and Agile methodologies, with practical knowledge of tools like JIRA for project management and Jenkins for CI/CD automation. Strong debugging, performance tuning, and end-to-end project delivery capabilities. Holds a B.Engg. in Computer Science and is committed to continuous learning and delivering innovative software solutions.

Education

B.Tech/B.E., 2021

Pune University

12th, 2017

Maharashtra, English

10th, 2015

Maharashtra, English

Key skills

- Agile Methodologies
- Kafka
- Eclipse
- Github
- Java
- Spring Boot
- Spring MVC
- Rest APIs
- Microservices
- JPA
- Hibernate
- Redis
- Oracle SQL
- GIT
- TFS
- Jenkins
- Postman
- JIRA
- JSON
- XML
- Maven
- Ci/Cd
- Angular (basic)

Work Experience

Jul 2022 - Present

Software Developer

Crif Solutions

- Collaborated on diverse business requirements for the credit bureau, ensuring the alignment of software solutions with stakeholder needs. - Analyzed, debugged, and developed software utilizing Java and frameworks such as Spring Boot and Spring MVC. - Implemented responsive front-end features using Angular CLI and integrated back-end services, enhancing user experience. - Designed and optimized JSP Servlets for dynamic web applications, improving performance and functionality. - Leveraged GraphQL to streamline data retrieval processes, resulting in increased efficiency and reduced query times. - Utilized HTML and CSS to create user-friendly interfaces, contributing to an overall improved user engagement. - Managed tasks and project progress using JIRA, ensuring timely delivery of software components and adherence to project timelines.

Projects

819 Days

Inquiry

- Developed a comprehensive banking application for Crif High Mark Credit Information Services, enabling efficient retrieval of credit reports for B2C, B2B, and commercial clients. - Analyzed credit and loan histories to ensure comprehensive and accurate data access, enhancing the quality of information provided. - Designed and implemented robust backend services utilizing Spring Boot, ensuring high performance and scalability. - Integrated Angular-based front-end components, facilitating seamless user interaction and improving the overall user experience. - Leveraged Oracle Database for secure and optimized data storage, enhancing data integrity and access speed. - Contributed to enhanced decision-making for clients by providing timely and reliable credit insights through the application.

365 Days

Inquiry-Verification

for Crif High Mark Credit Information Services. - Developed and managed robust APIs using Spring Boot and Java, ensuring seamless data exchange in JSON and XML formats. - Utilized JPA for efficient database interactions, optimizing data retrieval and manipulation processes. - Implemented Redis for caching, significantly improving application performance and response times. - Conducted comprehensive API testing and validation with Postman, ensuring accuracy and reliability of data exchanges.

Certification

- POC-OCI to AWS migration certificate
- HTML, CSS, and Javascript for Web Developers
- Software Development Process
